

5 CLAUDE SKILLS FOR VIDEO STYLES

Five free skills that make your videos look different, plus the YouTube Agent Skill that runs your channel. All simple, all from GitHub.

1

HyperFrames

HTML in, video out

2

onetake

One camera, never cuts

3

Collage B-roll

Paper collage that assembles itself

4

Claude Animation Base

Hand-painted cartoons with Clawd

5

Lemo-Opuscar

43 film styles, all made in code

+ YouTube Agent

11 skills for scripts, edits and plans

What each one **does**

1

HyperFrames by HeyGen

You write HTML, it renders the HTML to a real video, frame by frame. Good for launch films, explainers, captions and vertical clips.

[heygen-com/hyperframes](https://heygen.com/hyperframes)

Apache-2.0

needs Node • ffmpeg • Chrome

2

onetake

Short product or promo films (10 to 60 s) shot as one continuous camera move, with kinetic type and real UI.

[feitangyuan/onetake](https://feitangyuan.com/onetake)

free for non-commercial use only

3

Collage B-roll

Turns one spoken line into a paper-collage B-roll. You approve three steps: the idea, the still image, then the assembling animation (Google Gemini).

[pyang5166/gbro-collage-broll](https://pyang5166.github.io/gbro-collage-broll)

MIT

needs Python 3.10+ • ffmpeg • Gemini API key

4

Claude Animation Base

A starter kit for hand-painted cartoons in p5.js and p5.brush, starring Clawd, the Claude Code mascot. Plan the storyboard first, then animate.

[JohnHeibel/ClaudeAnimationBase](https://johnheibel.com/ClaudeAnimationBase)

MIT

needs Node • Chrome • ffmpeg

5

Lemo-Opuscar

43 film styles (oil painting, watercolor, ukiyo-e, satellite briefing and more). Every film is code, so no video model is needed.

[lemomo-ai/lemo-opuscar](https://lemomo-ai.com/lemo-opuscar)

MIT

needs Node • ffmpeg • Python

Check the licence first: onetake is free for personal, educational and research use. Commercial use (for example a monetized channel) is not allowed without a commercial licence.

Set up in 3 steps

1 Open Claude (Claude Code or the Claude app with skills).

2 Paste one link. Give Claude the GitHub link of the skill and ask it to install it:

Install this skill for me and read its instructions first:

<https://github.com/heygen-com/hyperframes>

3 Ask for your video. Say which style, which voice file, and what the video is about. Claude confirms the plan before it starts.

Which one should I pick?

I want...	Use
A clean explainer or promo from HTML	HyperFrames
One smooth camera move, product feel	onetake (non-commercial)
A unique paper-collage B-roll shot	Collage B-roll
Cute hand-painted cartoon story	Claude Animation Base
A film in a named art style	Lemo-Opuscar

BONUS · YOUTUBE AGENT SKILL

11 skills that run your YouTube channel. `/yt-script` writes your scripts with 21 proven hook formulas. `/yt-edit` edits your videos. `/yt-plan` plans your content strategy and the month. It also finds the most viral videos in your niche, explains why they worked, and writes the same structure in your own voice.

Setup takes about 10 seconds: open Claude, paste the one link, done.

Skill link: [github.com/...](https://github.com/heygen-com/hyperframes) (add the repo link here)
